Сертифицированные эталонные материалы (CRM) Phenova

Калибровка окружающей среды, внутренние и суррогатные стандарты

Сертифицированные эталонные материалы (CRM) Phenova предлагают **новый стандарт достоверности** для экологических испытаний, поскольку каждая партия проходит квалификацию путем сравнения ее с внутренними и независимыми материалами CRM, что гарантирует минимальное отслеживание тенденций и меньшее количество контрольных калибровок. Выбор калибровочных, внутренних и суррогатных стандартов производится и аналитически проверяется с использованием программ обеспечения качества, соответствующих стандартам ISO/IEC 17025 и ISO Guide 34, что гарантирует точность и согласованность, что приводит к повышению качества данных.

С Phenova CRM вы можете ожидать

- Расширенная калибровка, чтобы дольше оставаться под контролем
- Согласованность между партиями с минимальным трендом
- Сертификация ISO/IEC 17025 и ISO Guide 34

Доступные классы аналитов

- Топливо
- Летучие вещества
- Полулетучие (БНК и ПАУ)
- Пестициды/гербициды
- Полихлорированные бифенилы (ПХБ)

Кому необходимо использовать сертифицированные эталонные материалы?

Все экологические лаборатории, аккредитованные в соответствии с ISO/IEC 17025, должны использовать CRM. Даже если ваша лаборатория не имеет такой аккредитации, она все равно выигрывает от высокого стандарта качества продукции. Свяжитесь с нами сегодня, чтобы получить индивидуальную техническую поддержку, полную помощь в разработке методов и лучший выбор продуктов.
